

SMART FITNESS PLANNER

TEAM 2

CPT-200 – System Analysis and Design

OVERVIEW

Smart Fitness Planner is a web application designed to provide fully personalized workout plans without the need for equipment. The app adapts to each user's fitness goal (lose weight, gain muscle, or stay healthy), time availability, activity level, and training frequency, offering a flexible and realistic fitness experience.

OBJECTIVE

Through a simple and intuitive onboarding process, users input basic information, and the app generates a dynamic 7-day calendar with complete workout routines. Each day includes a warm-up, one or more workout circuits, and a cool down, depending on the time selected. All exercises are bodyweight-based and require no gym access, making it ideal for at-home workouts.

DEVELOPMENT

The app was built using Flask (Python) for the backend and SQLite for data storage. The frontend uses vanilla JavaScript, HTML5, and CSS3, offering full control over the user experience. Authentication is handled with both email/password and Google OAuth, and session management is powered by Flask-Session. Key features like dynamic onboarding, calendar generation, progress tracking, and profile uploads are all handled seamlessly, creating a clean and personalized fitness experience.

KEY CHANGES

- Replaced AI-generated plans with custom logic in JavaScript.
- Simplified the onboarding flow and made it more visual.
- Added edit mode with prefilled answers for smoother UX.
- Deleted unused dashboard and routes → cleaner, focused app.
- Built a dynamic calendar with progress tracking and checkboxes.
- Added modals with exercise descriptions for better guidance.
- Removed the stats/analytics section → kept the app simple and focused on training.

The background features a dark, high-contrast image of a mechanical device, possibly a turntable or a similar rotating component, with various parts and textures visible. A prominent, solid orange vertical bar runs along the right edge of the frame. The text 'LIVE DEMO' is centered in the upper half of the image.
